

INNOVATIVE

THERAPIES

DAYS 2025

5TH EDITION

OCTOBER 8TH EVENING

9TH & 10TH, 2025

BESANÇON, FRANCE, KURSAAL

Organized by

OBJECTIFS

- Reveal what goes on behind the scenes in the development of an innovative therapy
- Create a unique platform for exchanges between academics, scientists and industry.
- Support the creation of strategic partnerships to accelerate the industrialization of therapies.

POSITION YOURSELF AS MAIN ACTORS IN THE INDUSTRIALIZATION OF INNOVATIVE THERAPIES

Innovative Therapies Days is a translational congress which features top-level international scientific presentations, B2B meetings to facilitate exchanges between research and industry, an exhibitor village with targeted technologies.

CONFERENCES • POSTER SESSION • NETWORKING EVENINGS • EXHIBITIONS • B2B MEETINGS

• Research to Proof of Concept (PoC)

Exploring scientific innovations and their potential applications. This session focuses on the latest innovations and technological advances, right through to their evaluation in complex models.

• Proof of Concept (PoC) to Clinic

Facilitating the transition of innovative therapies to clinical trials, covering manufacturing processes, preclinical regulatory validation and partnership strategies.

• Early-stage clinical trials

Accelerating clinical development and preparing for market access, considering scale-up, compliance and distribution issues.

• Go to Market

Promoting a successful market launch by exploring reimbursement strategies, economic models, medical affairs and patient access to innovative therapies, including the contribution of AI to these models.
